AltoCrypt

AltoCrypt**Stik**

Access without compromise.

Portable, user-friendly secure mobility device for wireless classified network access, anytime, anywhere.

AltoCrypt Stik simplifies access to classified networks by integrating crypto, routing, and security appliances into one self-contained, compact USB device. This reduces the size, weight and power requirements for the user.

Utilising either enterprise Wi-Fi or the Internet, AltoCrypt Stik integrates with existing access gateways and cryptographic infrastructure. It is accredited and meets the requirements for handling the most classified data required by mobile users.

Features of AltoCrypt Stik

| Easy to use | Discreet & lightweight | Government approved encryption | No briefcases of powerpacks | Enables secure, remote network access |

AltoCrypt is an advanced set of cryptographic capabilities and miniaturised electronics. Across multiple form factors and use cases, AltoCrypt secures classified information on the move.

The AltoCrypt Suite is at the forefront of digital transformation. AltoCrypt secures government and private sectors through tailored software and hardware solutions, providing secure access to classified and sensitive data across multiple form factors and use cases.

The AltoCrypt suite provides advanced secure mobility solutions, and champions mobility, convenience, and security, safeguarding sensitive data in today's dynamic world.

How AltoCrypt Stik works

AltoCrypt Stik enables workforce mobility in classified office spaces by using standard Wi-Fi for cable-free, multi-tasking, collaboration, and data access, anytime, anywhere. It supports multiple classified networks on a common infrastructure.

AltoCrypt Stik offers remote access to classified networks through public, home, or personal hotspot Wi-Fi, all in a compact design that keeps staff mobile without the need for additional briefcases or powerpacks.

Technical Specifications

Weight	65g
Dimensions	(l) 81mm x (w) 31mm x (h) 16mm
Power	USB Interface
Routing Protocol Options	BGP
Operating System Options	Windows, Linux, Mac OS
Classified Computer Interface	Ethernet over USB
Management Interface	Any modern browser

ASD has developed the Australian Communications Security Instruction (ACSI) providing Defence and Australian Government users with the necessary advice to deploy the AltoCrypt Stik in a secure manner (ACSI 207C).
